

# 2002 SERIES

(CLASS A AND/OR B FOAM)

## NEW ENHANCED FEATURES

The FoamPro 2002 Series is NOW capable of quickly pulling concentrate **6 FEET** allowing for increased mounting and installation flexibility.

### 2002 Series featured updates include:

- Achieves full pump capacity with all Class A and most Class B foams with viscosities up to 2000 cps.
- Capable of pulling concentrate up to 6 feet (1.8 meters)
- Delivers 0.01 to 5.0 gpm (0.04 to 18.9 lpm)
- Injection pressures to 400 psi (27.6 BAR)
- Proportions continuously without stopping to refill foam tank
- No in-line restrictions in waterway, yielding higher flows in smaller piping without pressure loss
- Fully automatic-on demand proportioning
- Discharge side injection
- Unmatched accuracy over the widest range of water flows

### Options:

- Off-Board pickup kit **NEW!**
- Concentrate Management Systems
- Advanced Feature Controller with Auto-On
- Remote Start/Stop for pump and roll applications

### Off-Board Pickup Kit

FoamPro's optional fully automatic off-board pickup kit is designed for easy installation and operation.
