

Product Change Notification

Overview: Please be advised that the following is notice of change to the Fire Research WLA280 MaxVision LED Tank Display.

Products Affected: WLA280 MaxVision LED Tank Display.

Change Description: Effective as of April 18, 2016, the option to program the MaxVision (WLA280) to display the status level of Foam A or Foam B has been added. This option is in addition to the default setting to display the Water status level. Also, the option to program a “locked in”, customized color pattern on the MaxVision, as separate from the primary display, is available in nine (9) different color patterns. The default color pattern is synchronized with the primary display.

This new programming affects the WLA280 MaxVision starting with Serial Number 497500.

Reason for Change: As part of the ongoing process to improve FRC products, these new options were added to increase functionality and offer more flexibility to customize the product.

Replacement Product: Please contact the FRC Service department at either service@fireresearch.com or 1-800-645-0074 for more information.

References: For more details on these options, please review the product manual for the WLA300/WLA400 TankVision Pro. See the section titled “Program MaxVision LED Tank Display”.

Response: No response to this notification is required. Requests for additional information should be directed to an FRC sales representative at 1.800.645.0074.
